Objectives

After completing this lesson, you should be able to do the following:

- Create private and public synonyms

Synonyms

- Simplify access to objects by creating a synonym (another name for an object). With synonyms, we can:
 - **Create an easier reference to a table that is owned by another user**
 - **Shorten lengthy object names, such as views.**
- To refer to a table that is owned by another user, we need to prefix the table name with the name of the user who created it, followed by a period.
 - For example:
mali.employee {**mali** is user-name & **employee** is table-name}
So instead of referring a table like
scott.employee_qualifications, we can use **degrees**
- Creating a synonym eliminates the need to qualify the object name with the schema and provides us with an alternative name for a table, view, sequence, procedure, or other objects.

Synonyms

```
CREATE [PUBLIC] SYNONYM <synonym-name>  
FOR      object;
```

In the syntax:

PUBLIC

creates a synonym that is accessible to all users

Synonym-name

is the name of the synonym to be created

object

identifies the object for which the synonym is created

Once we define a synonym for an object, we can reference it in the SQL statements such as the SELECT, INSERT, UPDATE, and DELETE statement.

A private synonym name must be distinct from all other objects that are owned by the same user.

Creating and Removing Synonyms

- Create a shortened name for the DEPT_SAL_VU view:

```
CREATE SYNONYM d_sal FOR dept_sal_vu;
```

Synonym Created.

- Drop a synonym:

```
DROP SYNONYM d_sal;
```

Synonym dropped.

Creating Synonyms

```
SQL> SELECT * FROM QUALIFICATION;
```

7900	M. Com.
7902	M. TECH.
7934	B. Com.

```
14 rows selected.
```

```
SQL> CREATE SYNONYM Q FOR QUALIFICATION;
```

```
Synonym created.
```

```
SQL> SELECT * FROM Q;
```

```
14 rows selected.
```

Updating Synonyms

```
SQL> UPDATE Q SET DEGREE='M.Com'  
2 WHERE EMPNO=7934;
```

1 row updated.

```
SQL> SELECT * FROM Q;
```

EMPNO	DEGREE

Listing all Synonyms of a particular user

```
SQL> select OWNER, SYNONYM_NAME, TABLE_OWNER, TABLE_NAME from all_synonyms where owner in ('SCOTT');
```

OWNER	SYNONYM_NAME	TABLE_OWNER	TABLE_NAME
SCOTT	D	SCOTT	DEPT
SCOTT	Q	SCOTT	QUALIFICATION

```
SQL> select * from all_synonyms where owner in ('SCOTT');
```

OWNER	SYNONYM_NAME	TABLE_OWNER	TABLE_NAME	DB_LINK
SCOTT	D	SCOTT	DEPT	
SCOTT	Q	SCOTT	QUALIFICATION	

A large, stylized graphic featuring the words "Question & Answer" in a bold, sans-serif font. The word "Question" is in blue, and the ampersand "&" is in yellow. The word "Answer" is also in blue. The text is centered within a large, yellow, oval-shaped swoosh that has a blue outline. The swoosh is open at the top and bottom, with the ends curving outwards.
